THE ELECTROCHEMICAL SOCIETY, INC.

The Electrochemical Society is an international organization of individuals and companies concerned with or interested in Electrochemistry and allied subjects.

The Society is dedicated to the advancement of the theory and practice of Electrochemistry and related subjects, as shown in the following divisions:

Battery	Electro-Organic
Corrosion	Electrothermics and Metallurgy
Electric Insulation	Industrial Electrolytic
Electrodeposition	Theoretical Electrochemistry
Electronics	

Among the means to this end are the holding of meetings for the reading and discussion of professional and scientific papers on these subjects, the publication of such papers, discussions, and communications as may seem appropriate, and cooperation with chemical, electrical, and other scientific and technical societies.

It is an incorporated society without capital stock. The affairs of the Society are managed by a Board of Directors under a Constitution and Bylaws. Officers are nominated by a nominating committee appointed by the Board of Directors and elected by the members.

Direct all general correspondence and inquiries regarding membership to Society headquarters at 1860 Broadway, New York 23, N. Y.

Officers of the Society

President	W. C. Gardiner
Past President	Sherlock Swann, Jr.
Vice-President	R. A. Schaefer
Vice-President	H. B. Linford
Vice-President	F. L. LaQue
Treasurer	L. I. Gilbertson
Secretary	I. E. Campbell
